

I would like the FCC to maintain the FM translators in tact as they currently are. My primary listening station on the radio is K-Love translated on 91.3FM in my listening area. K-Love has a positive impact on the local community and is a vital part of our daily lives. The ability for K-Love to reach thousands of people through the FM translators across the country helps improve the moral and ethical development of students and citizens in general.

Thank you for maintaining the FM translators.

David J. Choate
